

**NEW DEMENTIA UNIT, SKILLED NURSING UNIT, MUNCY VALLEY HOSPITAL
MUNCY, PENNSYLVANIA**

An existing wing of the Skilled Nursing Unit was redesigned for use as a secure dementia unit within the hospital. A new dining room, activity area, nurse's station, shower room, and linen rooms are part of the renovated facility. The design responds to the special needs of the residents with detailed attention to lighting, materials and color selections which were made in close consultation with the administrator and her staff. The interior design presentation became part of the 80th anniversary event celebrating the hospital's history.
