

**VALLEY VIEW NURSING HOME,
ALTOONA, PENNSYLVANIA**

The two-story, 124 bed addition to the Blair County Nursing Home is designed to provide the existing facility with a modern and inviting environment. By integrating features typically used in upscale hotel architecture, the addition has the increased warmth and residential quality desired in today's long-term health care market.

The building addition includes a skylit lounge and dining areas overlooking a garden, centrally located nurses stations, small corridor seating areas, infection control rooms, and a 12-bed, state-of-the-art sub-acute care wing. The service basement provides a large central storage area with 3-bay loading dock and dietary kitchen.

The renovations and additions were completed in association with Gwin Dobson & Foreman, mechanical and electrical engineering consultant.
