

**ADDITION TO VIDEON CENTRAL,  
STATE COLLEGE, PENNSYLVANIA**

The Addition provides much needed manufacturing space and areas for supporting testing and administrative functions. The Link addition combining the new and existing buildings creates a multi-function, multi-level space for meetings, dining and relaxing. Designed as the showpiece of the entire Videon Complex, the warm and relaxing atmosphere of the link is further enhanced by large windows facing the new patio and lawn area between the buildings. The bulk of the Link contains a kitchen, demonstration theater, exercise room and men's and women's rooms with shower facilities. **HAAS Building Solutions** provided Architectural and Construction Management services to make this exciting project a reality.
