

**JEFFREY FIELD SEATING AND RENOVATIONS,
THE PENNSYLVANIA STATE UNIVERSITY**

Bleacher replacement for the intercollegiate soccer field included two new bleachers on the East and West sides of Jeffrey Field. These bleachers provide a total seating capacity of 4,962 with 2,387 on the East side and 2,575 on the West side. Each side includes a pressbox, both stairs and ramps for handicapped accessibility, and improved pedestrian circulation patterns under the bleachers.

The soccer field and one field light standard were relocated to the east of their original location to allow for placement of the new bleachers and improved pedestrian circulation behind and to the sides of the bleachers.

Design services for the new seating and renovations provided by **HAAS Building Solutions** included site design, placement of bleachers, a new soccer field, security fencing, and design coordination with the bleacher manufacturer.
