

ABERCROMBIE AND FITCH RENOVATION, STATE COLLEGE, PENNSYLVANIA

The Abercrombie & Fitch Building is designed as an infill project for a prominent vacant property in the center of the State College downtown shopping district. The client required a strong retail storefront design to match their corporation's image, yet the architectural design of the complete building needed to be compatible with the appearance of the downtown commercial district. Close continuous cooperation with the retail design team of Abercrombie & Fitch led to a successful design within a limited timeframe as required by the property owner.
